

GET AHEAD ! PLUMBING LEVEL 2

Course information and more.

- Q -Where could this course take me ?
- A—You could gain an apprenticeship in the plumbing and heating industry!
- A—You could progress onto level 3 and work in building services design!

Working within the plumbing and heating industry can be diverse and different every day. You could specialize in plumbing and heating and work towards gaining industry recognized qualifications.

One things for sure, as long as there is a need for sanitation (washing, toilet facilities) heating and hot water etc. As a plumber, you are going to be busy! Especially in the North East given our climate!!

“I cant thank the emergency plumber enough that came to fix my broken toilet. They were courteous, professional and completed the job on time. My family cant thank them enough...”
- Mrs. Jones

Q: What will I be doing on the course?

A: You will be in our state of the art workshops learning practical skills. You will also learn the theory elements of plumbing and heating in a classroom setting.

Q: How will I be assessed?

A: You will carry out practical assessments covering installation and repair of plumbing systems. You will also need to pass an exam covering the theory elements of the course. Your industry professional lecturer will guide you through the course.
